Catalyst

Procurement, Audit, analysis and sourcing

Catalyst is one of the UK's largest independent utilities companies. They offer a complete business consultancy service offering bespoke utilities solutions and strategies for the management of commercial electricity and gas requirements. They evaluate business needs and work with their customers to find solutions that meet their immediate and future requirements. They can advise on day-to-day requirements and consider how their clients can maximise efficiency whilst lowering overheads and ongoing costs.

Three Services

We have three core services, each designed to increase value in different ways:

- Energy Procurement
- Invoice Validation
- Account Management

• Energy Procurement

Our energy consultant's work with your purchasing staff to advice on contract type and market conditions. Then we'll build purchasing strategies and action plans that will deliver lower total cost and reduced risk of supply chain failure.

• Invoice Validation

We can then provide monthly invoice validation services and liaise directly with your accounts payable department.

• Account Management

Your Account Manager will become your single point of contact for any queries.

Independent Electricity Procurement Services

As independent utility consultants we offer a range of independent energy solutions and working with every major gas and electricity supplier ensures that our clients get the most competitive contracts available.

So that we can deal with your enquiry more effectively, we have split our electricity clients by business type, mirroring the way that energy suppliers work.

Businesses with an annual energy spend of under £40,000 and with less than 20-sites traditionally fall into the Small to Medium Enterprise or Commercial sector.

Businesses with an annual energy spend of over £40,000 with 20 sites or more or with any half-hourly electricity supplies are classified as Industrial & Corporate with most suppliers.

Small to Medium Enterprise - Services

- **Tender Requests:** We request all offers on your estimated supply consumption and present these offers back to you with a financial analysis and contract recommendation.
- **Market Drivers:** We can quickly identify opportunities for purchasing by identifying key market drivers that are influencing the market both short term and long term. We provide a within month report to identify these drivers along with a contract recommendation.

Industrial & Corporate - Services

- **We validate your supply points:** We confirm that your meter supply points belong to your company, as we have identified many supply contracts that have been on supply for years when the company isn't the legal owner.
- **We identify your annual usage:** We confirm with your current supplier your previous 12-months annual consumption.
- **Tender Requests:** We request all offers on your actual supply consumption and present these offers back to you with a financial analysis based on this consumption.
- **Market Drivers:** We can quickly identify opportunities for purchasing by identifying key market drivers that are influencing the market both short term and long term. We can advice on optimum contract length for either the key market drivers or your own budgetary requirements.
- **Contract Type:** With so many different types of gas contract available, and with many now including minimum and maximum take up clauses, we can offer practical advice on the varying contracts.
- **Ongoing Invoice Validation:** We will carry out an analysis of your bills to identify any potential errors or discrepancies.
