Catalyst

Procurement, Audit, analysis and sourcing

Catalyst is one of the UK's largest independent utilities companies. They offer a complete business consultancy service offering bespoke utilities solutions and strategies for the management of commercial electricity and gas requirements. They evaluate business needs and work with their customers to find solutions that meet their immediate and future requirements. They can advise on day-to-day requirements and consider how their clients can maximise efficiency whilst lowering overheads and ongoing costs.

Three Services

We have three core services, each designed to increase value in different ways:

- Energy Procurement
- Invoice Validation
- Account Management

• Energy Procurement

Our energy consultant's work with your purchasing staff to advice on contract type and market conditions. Then we'll build purchasing strategies and action plans that will deliver lower total cost and reduced risk of supply chain failure.

• Invoice Validation

We can then provide monthly invoice validation services and liaise directly with your accounts payable department.

• Account Management

Your Account Manager will become your single point of contact for any queries.

Independent Gas Procurement Services

As specialist Gas, Electricity, and Water consultants we recognise the importance of offering a complete range of gas procurement solutions. That's why we offer a wide range of fixed, innovative and flexible gas supply contracts to suit all business and commercial gas requirements.

Our supplier independence is important to us and we understand that your business needs are just as unique.

By offering a range of suppliers and options, you can choose the product that suits you best, including fixed rate contracts of up to three years duration, or contracts allowing you to manage the final price you pay for your gas.

Energy prices can fluctuate on a daily basis, and that is where large businesses can make big savings. We offer variable or indexed products, and market linked or tracker products which track wholesale energy markets over time.

Some businesses can enjoy lower prices by taking advantage of the volatility. These can even give you the same access to day-ahead market prices that were traditionally only available to the biggest businesses.

Benefits of the service

- **We validate your supply points:** We confirm that your meter supply points belong to your company, as we have identified many supply contracts that have been on supply for years when the company isn't the legal owner.
- **We identify your annual usage:** We confirm with National Grid Transco your previous 12-months annual consumption.
- **Tender Requests:** We request all offers on your actual supply consumption and present these offers back to you with a financial analysis based on this consumption.
- **Market Drivers:** We can quickly identify opportunities for purchasing by identifying key market drivers that are influencing the market both short term and long term.
- **Contract Length:** We can advice on optimum contract length for either the key market drivers or your own budgetary requirements.
- **Contract Type:** With so many different types of gas contract available, and with many now including minimum and maximum take up clauses, we can offer practical advice on the varying contracts.
- **Ongoing Invoice Validation:** We will carry out an analysis of your bills to identify any potential errors or discrepancies.
