Keeping you up to date with our latest business developments.

Half Hourly Electricity Services

As one of the UK's market leading energy consultants, our approach to the supply and management of your half hourly electricity account will add significant value to your business.

For over a decade Catalyst has been helping companies reduce their half hour electricity operating costs by decisive procurement and a range of energy management solutions.

Experts in our field, we currently work on behalf of thousands of UK companies, including major blue chip clients.

Collectively we have helped save them millions of pounds and significantly reduced their carbon emissions.

What we need and why do we need it

1. Letter of authority - This allows us to engage with suppliers on your behalf.

2. A recent copy invoice - To verify your current supply conditions.

3. Any current renewal offer - We will always request offers from you incumbent supplier as this provides a bench mark.

Free - Monthly Energy Consumption Report

As standard, we will provide you with a highly detailed monthly energy management report that will detail your energy use on a daily, weekly and monthly basis, which we deliver direct to your inbox on a monthly basis.
