

EXAMPLE PROJECT

Case Study

LED Lighting (*Current Project*)

Challenge

We are currently working with an aerospace manufacturer to install highly efficient LED lighting. Based on the feasibility and survey information, the client can expect to make savings of 1,010,476 kWh per annum equating to a saving of £137,687 per annum. The client would like a roll out plan for 4 other similar sites that have combined savings of over £500k.
