Business Water Switching Services

Catalyst in conjunction with our range of trusted water suppliers can carry out a comprehensive examination and analysis of your current water charges.

Compare Prices and Switch Suppliers

Scottish Businesses - If you're Business has a site in Scotland then switching water supplier is allowed no matter how much water you use. Unlike businesses in England they can also change their provider of waste and drainage services.

English Businesses - If your business has at least one site from which it operates in England which uses more than 5,000,000 litres (5 mega litres) per annum it can switch it's supplier of business water.

Previously the water usage threshold was set at 50,000,000 litres of water but in 2005 it was reduced to 5ML and is set to reduce again in the near future.

Who Can Switch

	Scotland	England
Customer	Any Business	5 Mega Litres
Water	Yes	Yes
Water Services	Yes	No
Drainage	Yes	No

Switching to Cheaper Business Water Provider

Switching could not be easier. All we need is some information from you regarding your location, current supplier and meter details.

We will then analyse and confirm your viability for switching provider and provide a savings quote based on your current water usage.

Full UK Deregulation

Scheduled for 2017 businesses in England will get the same power as Scotland to choose who supplies them with water, waste water and drainage services which should make for a more competitive market.

The Benefits of Switching Water Supplier

Catalyst provides services to not only help you switch water supplier but to save you money on future bills as well as looking at historic water bills to ensure you have been charged correctly.
