

“Catalyst is staffed with some of the country’s leading sustainability and energy experts. For more than 10 years our business has been focussed in energy management, procurement solutions and implementation.

Catalyst provides a blend of consultancy that is rare in our industry, balancing technical expertise with the commercial reality of client requirements.

We get personal; we’ll work in partnership with you to understand your business, your ethical perspective and your carbon requirements.

Of course, your future plans are paramount in developing the correct solution or strategy. We set a clear path with targets, review periods and milestones so we can work with you to optimise your energy position.”

Energy Compliance Services

The Energy Savings Opportunity Scheme (ESOS), set up by the Department of Energy and Climate Change (DECC), mandates large organisations to conduct audits of their energy use.

Qualifying organisations are required to measure the energy consumed in their buildings, transport and industrial processes, carry out energy audits and report their compliance. Compliance can be achieved by either implementing an ISO 50001 energy management system covering all energy use, or by appointing a Lead Assessor to carry out audits and/or review a variety of compliance routes. We provide a range of ESOS services, from guidance and oversight, to complete compliance support and ISO 50001 implementation. The deadline for compliance is 5 December 2015; penalties of up to £50,000 are applicable for noncompliance.

How do you comply with the scheme?

To comply with ESOS, you must:

1. Measure the energy you consume in buildings, transport and industrial processes
2. Audit areas of significant energy consumption through one of the methods in the table below

ROUTE TO COMPLIANCE	APPLICATION	REQUIRED RESOURCES
ESOS Energy Audits	All energy uses (buildings, processes, and transport)	Energy Auditor and Lead Assessor
ISO 50001 Energy Management System	All energy uses	ISO 500001 Auditor*
Display Energy Certificates (DECs)	Individual buildings	DEC Assessor and Lead Assessor
Green Deal Assessments	Individual buildings	Green Deal Assessor and Lead Assessor

We are able to support your ESOS compliance at whatever level is appropriate, whether that be reviewing existing audits to ensure compliance, or carrying out audits and acting as the Lead Assessor. Depending on your outlook we can provide either the fastest, most cost efficient route to compliance or use ESOS as an opportunity to provide strong business cases for implementing energy conservation measures and realising energy and carbon savings.

We have experienced and certified energy professionals and experience in all energy and carbon compliance areas, from the Carbon Reduction Commitment Energy Efficiency Scheme to ISO 50001.
